

Medical Provider Network

Custom Built. Value Based.

A cost-effective workers' compensation solution requires a top-notch Medical Provider Network (MPN). Successful outcomes depend on high-quality, convenient care built on evidence-based medical guidelines. At EK Health, we believe cost containment and quality can, and should, coexist. Focused on timely return to work, quality care, and convenient medical services, our MPN solutions yield a high return on investment and efficiencies.

Standard and Custom MPNs

With over 5,000 qualified medical providers, our state-approved MPN, EK Health Select, provides extensive California coverage with expedited implementation.

We can also customize an MPN to optimize the unique opportunities of your dynamics. For custom MPNs, we handle all of the nominations, credentialing, contracting, worksite panels, website, toll-free phone support, and quality management protocols.

Quality Management

In addition to a stringent due diligence process for adding providers to our MPN, we continually engage with MPN providers, clients, nurses, adjusters and injured employees. Engagement tools include granular MPN activity reporting, quarterly quality meetings, and ongoing provider validation.

FEATURES

- Contracting
- Credentialing
- Provider data management
- Provider relations
